FRIDAY, JUNE 20, 1890.

QUEBEC ELECTIONS

The returns of the elections for the Quebec Legislature indicate that the Mercier Government is sustained by a largely increased majority. The majority will range from twenty-five to thirty according to how the Independents vote. The result is mainly due to Mercier's appeal to the religious and race feelings of the French Canadian voters and proves that the French in Canada will resist all attempts to destroy their distinct nationality. It is a matter of little moment to us, what government is in power in Quebec, were it not that the issues raised in the campaign are of national importance and show the real sentiments of the French race in Canada towards the development of a Canadian nationality.

ONTARIO CROPS.

The Toronto Mail of June 12th, publishes reports from the different counties of Ontario, regarding the condition and prospects of the different cereals grown in the Province for the coming season. From these reports it would appear that in the majority of cases the crop of fall wheat will be good, if the excessive rains and damp weather do not cause rust. Oats, barley and spring wheat promise well, where the land is well drained, but in some sections are turning yellow, owing to continuous wet weather. Hay will be an abundant crop, in some places so heavy as to cause fear from rotting on the ground. Root crops are backward, on account of cold, wet weather. The fruit crop is expected to be very large. The Ontario farmers have become so accustomed to failure of crops during the past few years, that even an average crop this season would be a source of pleasure to them. They are beginning to realize that in the raising of cereals they cannot compete with the farmers on the prairies of the North West, and are going more extensively each year into dairying and fruit raising, for which industries a large portion of the Province is admirably adapted.

THE MAIL SERVICE.

The mail service provided by the Post Office department for the towns of the North West along the line of the C. P. R., is with one exception, very satisfactory. The mail is carried, as a rule, punctually and careful and responsible mail clerks are employed. The exception referred to above is the inconvenience which is shared by all the towns west of Brandon, of having no mail from the west on Wednesday evening or from the east on Thursday morning in each week. This is a matter that calls for remedy by the Department. Until about a year ago no mail was sent out of Winnipeg for the west on Wednesday, but the people as far west as Brandon commenced an agitation for, and were successful in obtaining, a local mail to Brandon. There are a great many reasons why this mail service should now be extended through to the Coast. Our merchants and business men do the great bulk of their trade with Winnipeg wholesale houses, and it is often a serious inconvenience for them to have no communication with these houses from Wednesday morning until Friday morning. The fact that this train only starts from Winnipeg does not alter the case, as most of the communications with eastern houses is made through Winnipeg agencies and branch houses. The mails from the south for the west are compelled to be held over in

Winnipeg for twenty-four hours once a week. The intention of the Canadian Mail Service is to provide as speedily and punctual a delivery of correspondence as possible, and it is in the carrying out of this principle that it has secured the confidence of the Canadian public. The fact that the mails referred to, are held in Winnipeg for twenty-four hours is in direct violation of this principle. The cause of complaint can be very easily remedied by the Department. It is only a matter of providing an extra mail clerk for the divisions west of Brandon and making arrangements with the railway company to carry the mail. We are sure that the business of the towns west of Brandon would fully justify the extra expense. As long as we are satisfied with the present arrangements and make no complaint, we cannot blame the Post Office Department for not extending the service. The time has now arrived, when all the towns along the C. P. R. west of Brandon should unite to secure this as a matter of convenience and necessity. In the name of the business men of the town of Moose Jaw, we request that a mail be sent west from Winnipeg to the Coast on this Wednesday train. We ask the co-operation of the Boards of Trade, the Press, and the citizens generally, of the towns interested, in our endeavour to secure this. We are confident that if it were represented to the Department, that our wants in this line were not being supplied, no time would be lost in making the matter right.

ELECTRIC LIGHT.

The question of electric light for street, commercial and domestic purposes is attracting considerable attention in Moose Jaw at present. The promoter of the scheme is canvassing the town thoroughly, and it is to be hoped that he will meet with the success which his energy and push merit. The plant which he proposes to put here, is, we believe, the best possible light for a town such as ours. The current used is of a low tension, and there is absolutely no danger from fire or of receiving serious shocks from defective wires, in fact it is equal to any known system for safety. The light given by this system is said to be superior to any of the other incandescent lights it being brighter, purer and nearer in color to the arc, than the incandescent light. The lamps burn with an even mellow light, do not gutter or flare as most of the arc lamps do, but give a light incomparably superior to oil or gas. The lamps of this system are divided into sixteen, thirty-two, forty-five, sixty and one hundred candle power. An ordinary well trimmed coal oil lamp gives nearly an eight candle power of light, thus it will be seen that the smallest of these incandescent lamps will give a volume of light equal to, and better than, two well trimmed oil lamps. The light capacity of larger lamps can be figured on the same basis. This comparison of light is here given to show about what can be expected in the way of light from the incandescent lamp, further than this it is impossible to compare them. Electricity creates no gases, is not liable to explosion, there is no unpleasant odor of oil, no leakage on carpet or clothing, no broken lamp chimneys, and lastly no cleaning of lamps. The fixtures of this system make it possible to turn the light on or off as it is required by consumers in their own houses or place of business, and it is intended to supply the current from sunset until such an hour as there will be sufficient demand for the light. We understand that up to this writing nearly enough light has been subscribed for to warrant its introduction. We have seen the schedule of rates and find that we would have to pay less for light here than at quite a large number of eastern cities, and higher than none except where the machinery is run by water power, when the rates are lower. The introduction of electric light, outside of its value to consumers, will give our town a higher standing in the outside world, and it must be said that where so much enterprise is shown by a community, there must be something to warrant their faith in the future growth and prosperity of the town, and resources of the surrounding district, and will cause many an intending settler to give a more serious thought to the Moose Jaw district than he otherwise would have done. Our town is hardly large enough as yet to give a paying support to the proposed investment, and we believe that all the help

possible should be given the scheme by our citizens and the Municipal and School Board in order to make it a success. It is not like asking a bonus or concession of any kind, but light will be furnished and everybody will receive their money's worth in good pure light. We heartily wish the scheme success, and emphatically say "Let there be light."

BUFFALO LAKE (East)

A Prosperous Settlement.

FINE FARMS—CROPS IN FIRST-CLASS CONDITION.

A representative of the TIMES took a trip through the settlement, at the east end of Buffalo Lake, this week, visiting the farms of Messrs D. Taylor, James McCartney, G. McCartney, Jas. and Hugh Thompson, Wm. Moffat, Hugh Gilmour, Jr., and H. C. Gilmour. This settlement is one of the most progressive and successful in the Moose Jaw district, and is composed of men who were successful farmers in the east and possess the enterprise and push necessary for success in the North West. Mr. G. McCartney came to this district last summer and has twenty-six acres in crop on his homestead this season. He is busy breaking and expects to have one hundred acres of wheat in next year. Mr. James McCartney has been living on his present homestead for seven years, and during that time had only one failure of crop, that of 1886. Last year he had a large field of wheat grown on stubble, which averaged twenty-nine bushels per acre. This year he has 135 acres of wheat which looks splendid, and promises a large harvest. He has a good sized, comfortable dwelling house, the necessary outbuildings, and plenty of water. He owns 640 acres of land, and his son Robert 320 acres, and intends to go into farming more extensively, having full confidence in the grain raising powers of his farm. Mr. Hugh Thompson is one of the successful bachelor farmers of this locality, but appearances indicate that he is thinking seriously of having someone to share the elegant new home which he is erecting on his farm. Mr. H. C. Gilmour left a good farm in the county of Huron, Ont., to come to the North West, where he could secure land for himself and sons in the same locality. He thoroughly understands the science of farming, and as a natural consequence, has made farming a success. He and his son Hugh have over 200 acres of crop this season, which is well advanced and looks well. He is at present erecting a fine house which will not only add to the comfort of himself and family, but be an ornament to the district. Mr. Gilmour's experience in the North West has been the means of inducing a large number of good settlers to come to the country. This district has a good school, organized in 1888, with a competent lady teacher, and an average attendance of 12. A Presbyterian Missionary, Mr. Gunn, holds fortnightly services in the school house and at Mr. Gilmour's house. Besides grain raising these farmers are going as extensively as circumstances will permit into stock raising, and have some fine thoroughbred cattle and horses. A large amount of land will be broken and prepared this summer for next season's crop. In conversation with these men they stated that they believed entirely in breaking shallow as early as possible in the summer and then backsetting in the fall, as the best plan of preparation for a crop. They then raise two crops without plowing and fallow the land in the third year. They claim that in this way the land is always kept clean and is in a condition to better retain the moisture in a dry season.

BUFFALO LAKE.

The following are the number of marks obtained by the pupils of Buffalo Lake school for the month ending June 13th, 1890—5th class—Katie Taylor 260; Mary McCartney 239; total 500. 4th class—Wm. Waller 119; total 200. 3rd class—James McCartney 177; Chas. Taylor 158; Sadie McCartney 158; total 500. 2nd class—Malcolm Taylor 75; Lucy Beveridge 70; total 100. 1st class—Annie Taylor 80; Maggie Franks 60; Willie Franks 60; Jessie Mitchell 50; total 260. 1st class—Ella Mitchell 76; Vero Mitchell 76; Alice Bennett 20; total 80. Number on register 14, average attendance 111.

MARY ALEXANDER, Teacher.

The grist mill, owned by the Regina Milling Company, was burned to the ground at two o'clock on Sunday morning. Fortunately the wind was blowing away from the elevator and this was saved. A large warehouse and three box cars were also burned. There was a fire under the boiler on Saturday, the engineer having left at six o'clock. The mill was insured for \$9,000. It cost originally \$20,000. A large number of people turned out to the fire, and several cars were pushed along the track out of reach of the flames. The loss falls on Mr. H. W. Hansell. No doubt the mill will be rebuilt in the fall.

Grip's Cartoon of June 4th is very suggestive. It represents Mr. Dalton McCarthy introducing Mr. Mowat of 1857, an able and earnest advocate of Equal Rights, to Mr. Mowat, Attorney General of Ontario, 1890. The younger Mr. Mowat carries a document "I wholly repudiate the charge that it is Protestant bigotry that implies us. All we are asking for is Equal Rights. We have asked or desired nothing more than the abolition of exclusive privilege." Attorney General Mowat carries a document entitled "School Law amendments." The venerable face of Hon. Geo. Brown looks down in wonder on the change which thirty-three years of political life has wrought. "Men may change, but principles never."

A good story is told of a minister preaching in a neighboring pulpit by exchange a short time ago, who found in the Bible a note requesting the prayers of the church on behalf of Bro. A., who has been deeply afflicted by the loss of his wife, and after reading the note and observing its request, learned, to his consternation, that it was a year old, and that the brother prayed for was present on that Sabbath for the first time with a new wife.

FORWARDED IS FORWARDED.

Many of the worst attacks of Cholera Morbus, cramps, dysentery, etc., come suddenly in the night and speedily and prompt means must be used against them. Dr. Fowler's Extract of Wild Strawberry is the remedy. Keep it at hand for emergencies. IT NEVER FAILS TO CURE OR RELIEVE.

NOTICE.

The Council of the Municipality of the Town of Moose Jaw will sit on Monday, June 25th, at 2 o'clock, in the Council Chamber.

Monday, June 16th, 1890,

at 2 o'clock.

for the purpose of revising the Assessment Roll. All persons having business with this Roll will govern themselves accordingly.

JAMES N. McDONALD, Clerk.

Clerk's Office, Moose Jaw, May 25th, 1890.

The above meeting postponed till

Wednesday, June 25th, 1890.

Tenders Wanted.

Sealed Tenders, addressed to the undersigned and marked "Tenders for Moose" will be received up to noon on Wednesday, June 25th, for the erection of a Moose Jaw, in the town of Moose Jaw, 1st and 2nd sections, 22, 23, 24 and 25, Township 21, Range 5, West of the 2nd Meridian, in the District of Assiniboia, North West Territory.

The regulations under which a lease will issue may be obtained at this Department, or at the office of the Agent of Dominion lands at Regina. Each tender must be accompanied by an accepted deposit of \$100, in favor of the Deputy of the Minister of the Interior for the amount of the bonus which the applicant is prepared to pay for the lease.

No tender by telegraph will be entertained.

JOHN R. HALL, Secretary.

Department of the Interior, Ottawa, 2nd June, 1890.

THE KEY TO HEALTH.

Dr. J. C. BURDOCK'S

Unlocks all the clogged passages of the Bowels, Kidneys and Liver, carrying off gradually without weakening the system, all the impurities and foul humor of the secretions, at the same time clearing the Acidity of the Stomach, curing Bileousness, Dyspepsia, Headaches, Dizziness, Heartburn, Constipation, Breeness of the Skin, Dropsy, Breeness of Vision, Jaundice, Sick Head, Erysipelas, Scrofula, Stuttering of the Heart, Nervousness, and General Debility; all these and many other similar complaints yield to the happy influence of BURDOCK'S BLOOD PURIFIER.

Higher Education of Women.

But the higher education of women as it is called, is already here. The experiment, if so we may term it, is now going on in many places, and on a scale of great magnitude. It is settled for the time being, at least, that their education is to be substantially the same as that of young men. They are receiving no quarter in the lists, but are boldly competing with their brothers for the prize of scholarship and intellectual supremacy. All told, there are today thousands of girls under collegiate instruction, and contending for scholastic degrees, and statistics show that they are strong in the battle.

It used to be prophesied that women would lose the loveliest qualities of womanhood in the strife and pursuit; but the event has proved that such baleful predictions were without justification. Of course it was so. Whether women compete with men in trade and industry, in public life, in platform debate, or in the realm of knowledge and learning, they retain and never lose or impair the charm and the power of their womanhood. The more they can do and know, the more attractive they become to men and the more they dominate their affections.

The only danger is that they will be driven too hard because of their williness, their spirit of emulation, and their conscientiousness. They are no eager to get ahead and to escape from old time conventional restraints that they need rather to be curbed than spurred. They will win the race more surely if they make an easy start.

Sensational Journalism Must Fail.

The public wants the truth and honors the truth. It is ready to accord praise and confidence, or condemnations or mistrust, and in nearly every case the public estimate is correct. It may seem a smart thing for a newspaper man to force his newspaper into sudden recognition by pandering the local taste for sensationalism, but he is sure to meet a reaction sooner or later, and his descent will be more rapid than his growth. No editor ever built himself up to an honorable place in the estimation of his community by abusing his brother editor. If he succeeded in winning the high regard of the public, that course is not the one by which it was gained. Of two newspapers in a locality — one resorting to personal vituperation, mud-slinging and sensationalism, the other pursuing a calm, persistent, upright course of gathering the news and publishing it without fear or favor, never stopping to reply to the waspish attacks of its rival — the latter will ride safely on the broad sea of public confidence and respect long after the wreck of the former has been cast upon the rocks of disaster and disgrace.

Poetic Sentiment.

To apply the poetic words "a medicine that is able to breathe life into a stone" to B. B. B. savors of exaggeration, but considering its countless cures and wonderful work even exaggeration seems justifiable if it convinces those who hesitate to try B. B. B. and he cures.

What's the Reason?

The causes of summer complaint, diarrhoea, dysentery, cholera morbus, etc., are the excessive heat, eating green fruit, over exertion, impure water and sudden chill. Dr. Fowler's Wild Strawberry is an infallible and prompt cure for all bowel complaints from whatever cause.

Stanley's Lectures

ENGAGED TO TALK IN AMERICA AT A GOODLY SUM.

London, June.—It is stated that H. M. Stanley will sail for New York with his wife on October 29th. Stanley has concluded arrangements to deliver fifty lectures in the United States during the fall and winter. For the lectures delivered in New York he is to receive £5,000 and for each lecture thereafter in the various cities, he is to receive £200.

Plucking Violets.

"A violet plucked will never grow again" so a good name once lost we never can regain. A article which after extended trial won great fame and as time rolls on by good deeds still increases, it is Burdock Blood Bitters the best cure for dyspepsia and all blood diseases.

Mr. J. T. Colton, mail clerk, who has been running on the M. & N. W. R. division, has been removed to the Winnipeg office, and will in future run between that city and Port Arthur, assuming his new route on Saturday.

Forwarded is Forwarded.

Many of the worst attacks of Cholera Morbus, cramps, dysentery, colic, etc., come suddenly in the night and speedy and prompt means must be used against them. Dr. Fowler's Extract of Wild Strawberry is the remedy. Keep it at hand for emergencies. IT NEVER FAILS TO CURE OR RELIEVE.

FACTS OF GREAT IMPORTANCE!

TO FARMERS OF CANADA AND THE WORLD.

THE BRANTFORD LIGHT STEEL BINDER.

WE do not claim to have received a Gold Medal at Paris, although we received two Silver Medals, but we DO CLAIM:—

- FIRST**—To have defeated the Massey (Toronto) Binder in every competition in the world, where we have met it on an equal footing.
- SECOND**—During the season of 1889-90, in Australasia, the "Brantford" defeated all the leading binders of the World. See list of victories.
- THIRD**—In the Australasian competitions the "Brantford" Binder defeated the Massey (Toronto) SIX TIMES; or EVERY TIME the two binders came into competition the "Brantford" was victorious. See list of victories.
- FOURTH**—The "Brantford" binder replaced every other binder of any consequence made in Canada in 1889. That is, where other makes of New binders failed and were returned, the "Brantford" was purchased and successfully finished the work.
- FIFTH**—We challenge any one to point to a single instance where a new "Brantford" has been returned through failure to do its work.
- SIXTH**—A great many more "Brantford" binders were sold in Canada in 1889 than of any OTHER MAKE, and as many as were sold by FOURTEEN other Canadian makers put together.
- SEVENTH**—The "Brantford" binder is a "Home" machine and has a "Home" record without a single defeat in any kind of crop, used by hundreds of satisfied farmers in all the provinces of the Dominion.
- EIGHTH**—The "Brantford" Binder, as sold "at home," is specially designed and built for home trade, and is particularly adapted to the needs of Canadian farms and farmers. For foreign countries it is built to suit the peculiarities of the land and crop prevailing where it is sold.
